

SO HOW DOES IT WORK?

SportsCode Player works like this. Performance information that has been recorded, assembled, edited and saved in SportsCode Pro or Elite is packaged into a file and transferred to SportsCode Player. It's in a type of "view only" format, which means the file cannot be modified or saved by a Player user, but it can be read and the information in it moved around to suit the needs of the individual.

Use SportsCode Player to:

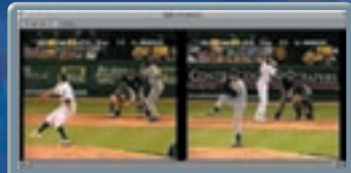

- design and execute performance strategies and plans
- accurately review individual and team goal setting
- identify and enhance team dynamics
- test the effectiveness of combinations and maneuvers
- improve individual actions and reactions
- cue thoughts, feels and rhythms pre-performance
- make head-to-head comparisons in speed – and technique-related performances
- enhance visualization and mental rehearsal skills
- analyze the game plans and performance of opposing teams – and find ways to challenge them.

It's a highly effective way of working one-to-one with coaches and players – for example, by giving a player a file of their own latest performance compared to that of their opposing counterpart, or giving a coach records of a maneuver developed and implemented throughout the season.

SportsCode Player's Macintosh-based platform is easy and practical to use. What's more, it's highly portable – simply install SportsCode Player on an iBook and take it home or on the road. SportsCode Player runs on a standard Apple platform and uses off-the-shelf hardware, so it's also easy to obtain local support.

SET-UP REQUIREMENTS

The minimum computer requirements for SportsCode Player are:

- iBook or iMac
- Apple system software version 9.1 or later
- Minimum 256MB of available RAM.

Recommended peripherals include:

- VST Firewire hard drive – 30/80Gb

Make it easy on yourself...

Talk to us about the SportsCode Player package, which contains:

- the SportsCode Player software
- an iMac or iBook
- a Panasonic digital video camera.

SPORTSTEC – PERFORMANCE TECHNOLOGY SPECIALISTS

Sportstec is a leading provider of sporting technology designed to maximize individual and team performance.

The Sportstec range of sophisticated, innovative equipment has been developed and tested by specialists in sports science, training and medicine. They know and understand the rigorous demands of the sporting environment – and the importance of the competitive edge.

The result is a suite of products designed to meet the exacting demands of players, coaches and sporting organizations all over the world. Each exploits leading-edge technology to test and analyze performance, empowering individuals and teams to seize new opportunities to improve – and win.

"Judging by this product [SportsCode Pro], if other Sportstec International products are similar in quality, affordability and ease of use, the company is in for a very long and successful run in the United States sports scene."

Jeff House, Assistant Coach, New York Liberty, National Women's Basketball Association.

"SportsCode....has rapidly become the industry standard in games' analysis."

John Crampton, New South Wales Institute of Sport, Australia.

The Ultimate Game Plan

SPORTSCODE – RANGE OF PRODUCTS

The SportsCode range of products have been designed to help coaches and trainers boost performance at all levels.

- SportsCode Pro is the ultimate coaching tool, designed for the full range of performance disciplines
- SportsCode Elite is a highly customized version of SportsCode Pro for organizations planning extensive use among several networked users

SportsCode Player is a 'play-only' application to be used in conjunction with SportsCode Pro or SportsCode Elite.

SportsCode Player enables athletes to review edited SportsCode files on their own machine in their own time.

Gamebreaker is a powerful SportsCode Pro-based system designed for athletes and teams who are serious about winning.
