

Capture

- Capture video live from a DV camera or after the event from DV tape, VHS or DVD
- **Review instances while capturing**
- Code the video while capturing video content
- Supports DV, DV widescreen, Analogue, MPEG4, SDI, HD
- Preset capture time
- On the fly compression
- Supports 4x3, 16x9, Native movie dimensions

Coding Structures

- No predefined structures of coding templates – you set the rules
- Define your own code and label buttons
- Set lead and lag times for codes or leave them as toggles
- Define powerful coding relationships through the use of activation and exclusive code behaviors
- Code in full screen
- Define keyboard hot keys
- Supports multiple input devices for multiple coders
- No limit on how many Code Input Windows you can have, making it possible to use the same program across multiple disciplines
- Edit and re-edit your templates as often as required
- **Code and access events live**

Search

- Quickly locate and review events, even across timelines and folders
- Up to 20 search combinations
- Perform multi leveled Boolean search routines
- Search for data from 1 game or event or across entire season or database
- Find and review events from the Code Matrix
- Set up Boolean (and, or and not) search criteria within the Matrix

Import

- Data lists
- Specific competition statistics

Analysis

- Intelligent searching with up to 20 search combinations using or and, or and not routines
- SportsCode Elite's Code Matrix cleverly pulls together vital statistical information with the corresponding video
- **Isolate game breaking information by analyzing and comparing code matrices across specific time periods**
- Create a still image from any video frame
- Conduct multi leveled statistical inquiries
- Splice video files to play side by side
- Overlay any two video files
- Create video databases
- Review frequency lists for events
- Export statistical information for further investigation in other programs
- Review sequential frames within any video instance through the Instance Monitor
- Insert text notes into instances to make effective coaches presentations
- Draw angles and lines on any movie frame
- Create meaningful drawings to highlight key plays and combinations.

Making Movies

- View Instances in multiple window sizes
- Replay video at different speeds, frame by frame, fast forward/backward
- View single instances or compile multiple instances and make a movie
- Present a movie on your computer or an external device
- Integrate your movie into other applications such as PowerPoint
- **Quickly compile movie presentations with titles in the Movie Organizer**
- Simply edit instance lengths and codes

The Elite Difference:

- **Live access to video during capture**
- **Powerful Exclusive and Activation code behaviours**
- **Review and compare critical statistical information backed up by video for specific time periods through the Dynamic Code Matrix**
- **Create professional movies at the click of a button with Elite's Movie Organizer**
- **Visual frame accurate editing tool**

Capture

- Capture video live from a DV camera or after the event from DV tape, VHS or DVD
- Code the video while capturing video content
- Supports DV, DV widescreen, Analogue, MPEG4, SDI, HD
- Preset capture time
- On the fly compression
- Supports 4x3, 6x9, Native movie dimensions

Coding Structures

- No predefined structures of coding templates – you set the rules
- Define your own code and **label buttons**
- Set lead and lag times for codes or leave them as toggles
- Code in full screen
- Define keyboard hot keys
- Supports multiple input devices for multiple coders
- No limit on how many Code Input Windows you can have, making it possible to use the same program across multiple disciplines

- Replay video at different speeds, frame by frame, fast forward/backward
- View single instances or compile multiple instances and make a movie
- Present a movie on your computer or an external device
- Integrate your movie into other applications such as PowerPoint
- Quickly compile movie presentations and player tapes
- Simply edit instance lengths and codes

The Pro Difference

- **Powerful descriptive coding capabilities with Text Label buttons**
- **Impressive Search capabilities within and across timelines and folders**
- **Remarkable ability to compare events through the combination and analysis of Timelines**
- **Instantly review statistical information backed up with the corresponding video in the Code Matrix**
- **Create meaningful presentations with the addition of text based Instance Notes**

General

- Only works with SportsCode Pro or Elite files
- Access to SportsCode Pro coding and analysis tools

Coding Structures

- No predefined structures of coding templates – you set the rules
- Define your own code and label buttons
- Set lead and lag times for codes or leave them as toggles

General

- SportsCode Player is a view only product i.e. there is no capture, coding or editing capabilities
- Only works with SportsCode Pro or Elite files
- SportsCode Player is a fantastic tool for players and assistant coaches who do not require the full editing and capture functionality available in Pro or Elite

Search

- Quickly locate and review events, even across timelines and folders
- Up to 20 search combinations
- Perform multi leveled Boolean search routines
- Search for data from 1 game or event or across entire season or database

- No limit on how many Code Input Windows you can have, making it possible to use the same program across multiple disciplines
- Edit and re-edit your templates as often as required

Import

- Trak Performance data

Video Databases

- Create powerful video databases that enable you to access video data from across time periods at the touch of a button.
- Ability to compress video instances on the fly during a database exercise

Analysis

- Create a still image from any video frame
- Splice video files to play side by side
- Overlay any two video files
- Review frequency lists for events
- Export statistical information for further investigation in other programs
- Review sequential frames within any video instance through the Instance Monitor
- Draw angles and lines on any movie frame
- Create meaningful drawings for “playbooks” and scouting reports.

Making Movies

- View Instances in multiple window sizes
- Replay video at different speeds, frame by frame, fast forward/backward
- View single instances or compile multiple instances and make a movie
- Present a movie on your computer or an external device
- Integrate your movie into other applications such as PowerPoint
- Quickly compile movie presentations and player tapes
- Simply edit instance lengths and codes
